Be sure to read the following warnings before use.

Do not use at other voltages than the specified power supply voltage. Doing so might cause fire, overheating, injury or electric shock. Use only AC adapter (sold separately) designated for your product.

Be sure to turn off the product before changing the battery. Doing so might cause fire, overheating, rupture or leakage.

Be sure to turn off the product before removing the specified charging equipment from the product. Doing so might cause fire, overheating, rupture or leakage.

Be careful not to injure your hand or finger when attaching/removing the Au Micro IC Card (LTE). Doing so might cause injury or a fault.

Be sure to read the following warnings before use.

When using the product near an implanted pacemaker, implanted cardioverter-defibrillator or other electronic medical devices, radio waves might affect these and devices. So, please observe the following.

1. Those with an implanted pacemaker or implanted cardioverter-defibrillator should carry a medical ID card.

2. A separation of at least 15 cm from where you are using this product is sufficient to avoid interference with the electronic medical devices. However, it is believed that this product is not intended to be a substitute for medical advice as there might be individuals nearby with an implanted pacemaker or implanted cardioverter-defibrillator.

3. When a medical institution has laid down designated areas where use of the product is restricted, use the product according to the instructions of the institution.

Be sure to read the following warnings before use.

Do not use a battery pack that has been dropped, stepped on, damaged, or leaking battery fluid. Doing so might cause overheating, ignition, liquid leakage, rupture, fire or injury. Immediately turn off the product and stop using the battery pack. Failure to do so might cause fire or damage.

The battery pack is a consumable item. If the performance of a battery pack does not recover even if it is recharged, please contact the WiMAX operator to whom you are subscribed. Never charge the wet battery pack.

CAUTION

Be sure to read the following warnings before use.

Do not use the specified charging equipment (sold separately) to charge the battery pack. Doing so might cause fire, overheating, rupture or leakage.

Do not leave the specified charging equipment (sold separately) to charge the battery pack. Doing so might cause fire, overheating, rupture or leakage.

Be sure to read the following warnings before use.

Do not swing the product around by holding the hand strap, etc. Doing so might cause an accident or injury.

Do not drop the product during cleaning. Failure to do so might cause fire, overheating, rupture or leakage.

Be careful not to injure your hand or finger when attaching/removing the Au Micro IC Card (LTE) when you are holding the product. Failure to do so might cause injury or a fault.

Be sure to read the following warnings before use.

Keep the AC adapter’s power plug of the specified charging equipment (sold separately) dry. Failure to do so might cause fire, overheating, rupture or leakage.

Be sure to read the following warnings before use.

Never charge the wet battery pack.
Battery pack
Use in very hot or cold environments, for example, when left in an automobile with the windows closed, may cause overcharging or overdischarging of the battery pack and affect the performance and life of the battery pack. This will also shorten the battery pack’s service life. Try to use the battery pack at a room temperature. When the battery pack is not to be used for a long time, remove the rear cover and remove the battery pack from the device. Keep the rear cover free of dust and foreign objects. Battery packs sometimes sweat up to they approach the end of their service life. This is due to the lithium ions inside the battery pack diffusing to the surface of the battery, and is a problem in terms of safety. 

Do not keep or store your battery pack in a location with extremely high or low temperatures.

Do not use the product in extremely hot, cold or humid places.

Do not keep or store the battery pack in a location subject to static or vibration.

Do not expose the terminals to rust or dust.

Keep the battery pack clean and dry. Do not allow any water, saliva, etc. to come in contact with the terminals. If water, saliva, etc. gets into the terminals of the battery pack, it will cause the battery performance to deteriorate, and may result in heat generation, deformation, or fire.

Even if you do not use your device, the battery pack may lose its charge. Keep the battery pack charged by keeping it in a location where the temperature is around 77°F (25°C) for 24 hours. If you do not use your device for a long time, charge the battery pack once a month to keep the battery pack’s life.

Do not expose the battery pack to water or any other type of liquid (including rain, snow, vapor, sweat, sea water, or swimming pool or ocean water). Do not use the battery pack in a location where water or liquid might enter. If the battery pack gets wet or the water or any other type of liquid (including rain, snow, vapor, sweat, sea water, or swimming pool or ocean water) gets in contact with the battery pack, it will cause the battery performance to deteriorate, and may result in heat generation, deformation, or fire.

Do not forcefully press, tap or intentionally subject the display to strong impact. Doing so might cause scratching or damage. Such damage and malfunction are not covered by the warranty, even if there is no visible damage. 

Do not use the product during exposure to strong static or electromagnetic environment. Use of or exposure to static or electromagnetic environment may cause the product to malfunction.

Do not apply excessive force when cleaning connection terminals to the battery pack or the battery charger.

If using an au Micro IC Card (LTE), be sure to take the following measures.

Always use the soft dry cloth (such as the type used for eyeglasses). Forceful rubbing with a cloth might cause scratching or damage.

Clean the product with a soft dry cloth (such as the type used for eyeglasses). Do not use any other type of cloth or fluid.

Do not forcefully press, tap or intentionally subject the display to strong impact. Doing so might cause scratching or damage. Such damage and malfunction are not covered by the warranty, even if there is no visible damage.

Do not use or leave this product in locations subject to strong static or electromagnetic environment.

Do not use or leave this product in locations where water or liquid might enter. If the product gets wet or the water or any other type of liquid (including rain, snow, vapor, sweat, sea water, or swimming pool or ocean water) gets in contact with the product, it will cause the product to malfunction.

Do not use or leave this product in locations subject to strong static or electromagnetic environment.

Do not forcefully press, tap or intentionally subject the display to strong impact. Doing so might cause scratching or damage. Such damage and malfunction are not covered by the warranty, even if there is no visible damage.

Do not forcefully press, tap or intentionally subject the display to strong impact. Doing so might cause scratching or damage. Such damage and malfunction are not covered by the warranty, even if there is no visible damage.

Do not use the product during exposure to strong static or electromagnetic environment, and do not use the product in locations subject to strong static or electromagnetic environment.

Do not forcefully press, tap or intentionally subject the display to strong impact. Doing so might cause scratching or damage. Such damage and malfunction are not covered by the warranty, even if there is no visible damage.

Do not forcefully press, tap or intentionally subject the display to strong impact. Doing so might cause scratching or damage. Such damage and malfunction are not covered by the warranty, even if there is no visible damage.

Do not forcefully press, tap or intentionally subject the display to strong impact. Doing so might cause scratching or damage. Such damage and malfunction are not covered by the warranty, even if there is no visible damage.

Do not forcefully press, tap or intentionally subject the display to strong impact. Doing so might cause scratching or damage. Such damage and malfunction are not covered by the warranty, even if there is no visible damage.

Do not forcefully press, tap or intentionally subject the display to strong impact. Doing so might cause scratching or damage. Such damage and malfunction are not covered by the warranty, even if there is no visible damage.

Do not forcefully press, tap or intentionally subject the display to strong impact. Doing so might cause scratching or damage. Such damage and malfunction are not covered by the warranty, even if there is no visible damage.

Do not forcefully press, tap or intentionally subject the display to strong impact. Doing so might cause scratching or damage. Such damage and malfunction are not covered by the warranty, even if there is no visible damage.

Do not forcefully press, tap or intentionally subject the display to strong impact. Doing so might cause scratching or damage. Such damage and malfunction are not covered by the warranty, even if there is no visible damage.
